📄 SUMMARY

I'm a Backend Developer seeking to leverage expertise in building scalable web applications, utilizing strong knowledge of Django, Python and JavaScript programming for creating exceptional user experiences.

📁 PROJECTS

Social Media Website 🔗

April 2023 – June 2023

- Social Media Website where users can post contents, engage with contents, follow users, chat with friends, create groups, and so on.
- I employed technologies like Python, Django, JavaScript, Django Channels, Bootstrap, CSS and HTML in building the project.
- Here is the link to the live website. Click 🔗

Falcon9 Page | SpaceX Clone 🔗

January 2023 – February 2023

- I built a duplicate of the SpaceX falcon9 page as of January, 2023.
- I employed technologies like HTML, CSS and JavaScript in building the webpage.
- Here is the link to the live webpage. Click 🔗.

eCourses Website 🔗

May 2023 – June 2023

- eCourses website, where users can learn online, purchase courses and create courses.
- Technologies I used in developing this project are Python, Django, JavaScript, JQuery, Bootstrap, CSS and HTML.
- Here is the link to the live website. Click 🔗

🎓 EDUCATION

Computer and Electrical / Electronics Engineering, University of Uyo 🔗

November 2019 – present | Uyo, Nigeria

👛 PROFESSIONAL EXPERIENCE

ALX africa, SOFTWARE ENGINEER INTERN 🔗

February 2023 – present

- I built a simple Linux shell for software development purposes, such as interacting with one's operating system, etc.
- Created some C libraries which reduced the time and effort needed to get some tasks done.
- Collaborated with fellow interns on building projects.

Zuri Team, Inc.,

WEB DEVELOPMENT INTERN 🔗

September 2022 – December 2022

- Created beautiful and responsive websites which include a portfolio website, a tribute website, just to mention, but a few.
- Employed back-end framework like Django to create APIs with CRUD functionalities, which eliminates lots of stress for front-end developers.

🧠 SKILLS

Python

Django

JavaScript

JQuery

Bootstrap

CSS

HTML
